

Product Specifications

PE2* | Revised January 2016

5mm Close Mesh

3mm Extra Close Mesh

Product Description: Covering all facial hair is equally important in assuring products security. Beard nets are available in a range of light mesh structures that provide perfect protection and allows the wearer to breath easily without condensation build-up.

Our single size beard nets are made from woven polypropylene mesh and feature two metal detectable grips. Available in close or extra close mesh.

Product Code: PE2*

Batch Quantity: Packs of 36 (on a card)

Batch Weight: 0.05kg

Product Dimensions: Adjustable

Colour Availability: Blue* | Red | Green | White

Product Advantages:

- ✓ Detectable by conventional metal detection systems
- ✓ Highly visible bright blue colour for easy visual identification
- ✓ Significantly reduces foreign body facial hair contamination
- ✓ Two integral metal detectable grips reduces the risk of the product itself becoming a foreign body contaminant

Product Material(s): Manufactured from Polypropylene 56 Decitex (ISO 9001), featuring elastic made from nylon covered rubber and two Stainless Steel grips.

Product Variants:

<u>Product Code</u>	<u>Colour</u>	<u>Mesh Size</u>
PE2876TB	Blue	5mm Close Mesh
PE2876TG	Green	5mm Close Mesh
PE2876TR	Red	5mm Close Mesh
PE2876TW	White	5mm Close Mesh
*PE2926TB	Blue	3mm Extra Close Mesh

Metal Detectability

These Beard Nets contain two 5mm Stainless Steel grips which can be detected by correctly calibrated metal detection systems.

The detectability of this product will vary based upon the metal detection systems being used and their calibration. Detectability performance will vary based on, but not limited to the following factors:

- Detector Calibration Levels
- Food Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Contaminant Orientation

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be recalibrated in order to reliably detect this product and its fragments. Such a professional should be available by contacting the manufacturer of your metal detection system.
