

BST DETECTABLE 12L BUCKET

MADE FROM FOOD GRADE METAL DETECTABLE PDPE

PAGE 1 of 2

Product Specifications

BU1B112LMB | Revised October 2014

Product Name: BST Detectable 12L Bucket

Product Description: This fully metal detectable bucket features dual handles either side and is designed to be easily lifted from a flat surface. The buckets strong metal detectable HDPE construction makes it ideal for use in the food industry, making them strong, durable, light weight, food safe and metal detectable.

Suitable for food / ingredient storage, mixing, handling and transportation.

Product Material: High Density Polyethylene with food safe metal detectable additive

Product Prefix: BU1B112LMB

Product Colour: Blue

Pack Size: 1 Pack

Product Advantages:

- ✓ Detectable by in-line metal detection systems
- ✓ Bright blue colour for easy visual identification
- ✓ Strong, durable, lightweight for optimum performance and lifespan
- ✓ Food grade material suitable for food contact applications
- ✓ Can be used as part of HACCP and BRC procedures
- ✓ Displays due diligence in the prevention of foreign body contamination

BST DETECTABLE 12L BUCKET

MADE FROM FOOD GRADE METAL DETECTABLE PDPE

PAGE 2 of 2

Material Information / Food Contact Status

The base material for this product is ExxonMobil™ HDPE HMA 018, which is designed primarily for use in food contact applications, specifically food packaging containers. This base resin contains an evenly dispersed metal detectable pigment (AISI 302 Stainless Steel) which is also generally considered safe and suitable for food contact applications.

Metal Detectability

The material of this bucket is intended to be detected by metal detection systems. Detectability performance will vary based on, but not limited to the following factors:

- Detector Calibration Levels
- Food Product Type (E.g. Wet, Dry, Frozen, Liquid)
- Aperture Dimensions
- Contaminant Orientation

For this reason BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment needs to be recalibrated in order to reliably detect this product and its fragments. Such a professional should be available by contacting the manufacturer of your metal detection system.
