

BST RETAINER CLIPS

DETECTABLE SUCTION CUP RETAINING CLIPS

PAGE 1 of 2

Product Specifications

CU3R* | Revised March 2015

Product Name: BST Detectable Suction Cup retaining Clips

Product Description Our food grade detectable retainer clips are designed to secure our detectable suction cups to a vacuum depanner belt, providing a completely detectable depanning solution.

The heat and speed of the depanning process results in the inevitable wear of components including suction cups and retaining clips – should a component fail and become detached, it is essential that this component is detected and results in the contaminated product being rejected from the production line.

Product Code: CU3R*

Pack Size: Pack of 100

Product Advantages:

- ✓ Detectable by conventional metal detection systems
- ✓ Highly visible blue colours for easy visual identification
- ✓ Available in a variety of styles to suit different applications
- ✓ Food Grade Material

Clip Sizes / Styles:

<u>Clip Code</u>	<u>Legacy Code</u>	<u>Clip Style</u>	<u>Bore Hole</u>	<u>Fits Cups</u>
CU3RSG661MB	MDR001	Standard Single	6.6mm	40mm & 36mm standard cups
CU3RSG801MB	MDR002	Standard Single	8.0mm	40mm & 36mm standard cups
CU3RSG901MB	MDR003	Standard Single	9.0mm	40mm & 36mm standard cups
CU3RDD161MB	MDR004	16mm Deep Double Decker	9.0mm	40mm & 36mm standard cups
CU3RLR301MB	MDR005	30mm Deep Long Neck	9.0mm	Only 40mm long neck cup

Standards Compliance

The detectable depanner belt retainer clips, although not used in direct contact with the food, are manufactured from plastic polymer grades intended for various food contact applications in the European Members States, and the U.S.A., and are compliant with EU Directive 2002/72/EC.

Detectability

BST detectable retaining clips contain an evenly dispersed metal detectable additive, making them detectable by correctly calibrated metal detection systems.

Our range of detectable suction cups and retainer clips is continually developed, and has been sold successfully for approximately 27 years. The products have successfully helped prevent food product contamination. By fitting these detectable products to suction depanner belts indicates that the food manufacturer is acting diligently.

It should be noted however that all applications vary, as do the products being handled, and therefore BST cannot accept any liability for detection failure, for example due particularly to small parts or pieces of a suction cup not being detected. BST recommend that all our products be thoroughly tested on your metal detection systems by a trained and certified professional. It may be the case that your equipment may need to be recalibrated in order to reliably detect this product. Such a professional should be available by contacting the manufacturer of your metal detection system.
